

EARTH DISTURBING PERMIT APPLICATION

Please note that an Erosion and Sediment Control Plan and Associated Construction Drawings are required in order to submit a completed application for an Earth Disturbing Permit through our online portal. If file size prohibits you from uploading your required documentation, there is a space provided for links to application files on this form. If you are unable to upload your application, please contact our offices at (513) 695-1337 for assistance in submitting your application through alternate means.

Once completed, your site and plans will be reviewed and Warren Co SWCD staff will follow-up regarding your application status. If there are fees associated with your permit based on the MS4 location of your project, you will be notified of the amount owed at that time. Unfortunately we are unable to accept permit fees before your site has been inspected and your application materials have been approved.
